

ABOUT ME

Master's student focusing on information systems analysis, AI data analytics, and tech-driven management decisions. Experienced in transforming IT solutions into practical business value through national research projects and competitions. Adept at cross-functional collaboration, communication, and result-oriented execution, seeking an internship to leverage tech-driven insights for business optimization.

EDUCATION

- National Sun Yat-sen University (NSYSU) | Sep 2025 – Present
M.S. in Information Management
 - National Changhua University of Education (NCUE) | Sep 2021 – Jun 2025
B.S. in Information Management
- GPA: 4.0/4.0

PROJECT & COMPETITION EXPERIENCE

2026 TSMC Smart Manufacturing Workshop | 2nd Place | Team Leader & Lead Presenter

- Served as the Team Leader and Lead Presenter for a 7-member cross-functional team, designing and pitching an "Agent-Driven Diagnostic Architecture" with LLM integration.
- Solved a critical operational bottleneck, projecting a reduction of 1.5 hours in daily debugging time per engineer, equivalent to saving \$360,000 NTD in annual operational costs.

Retail Analytics Joint Project (NCKU DAC x Data Firm) | Power BI Lead

- Spearheaded the data preparation and visualization pipeline by cleaning and processing 8,400+ transactional records (2023–2026) from a boutique bakery across physical retail, e-commerce, and group-buying channels.
- Designed and executed interactive Power BI dashboards to uncover seasonal sales trends and group-buying behavior, empowering the business to optimize influencer marketing with a projected 80% increase in revenue and decision-making precision.

National Science and Technology Council (NSTC) Research Project | Project Lead & Core Developer

- Published: 2025 International Conference on Cross-disciplinary Innovation Design.
- Designed interactive interfaces and implemented MAKAR for an XR-based puzzle game aimed at cognitive stimulation for the elderly.
- Conducted rigorous quantitative analysis using SmartPLS and Excel, proving the system successfully boosted elderly users' technology acceptance rate from an initial 10-20% to 70-80% and significantly enhanced their cognitive focus.

National Creative Marketing Competition Marketing & Technology | Best Digital Application Award.

- Proposed a highly viable digital marketing solution by balancing creative ideation with technical feasibility.
- Integrated interactive digital experiences into traditional temple tourism, successfully increasing younger demographic engagement by 20-30%, thereby driving local tourism revenue and revitalizing the community economy.

WORK EXPERIENCE

Teaching Assistant, System Analysis and Design | National Sun Yat-sen University | Sep 2025 – Dec 2025

- Provided technical support for students' software/hardware troubleshooting and acted as a primary communication bridge between the faculty and students.
